,		between the two dates is covered by the observations in this report which confirms the departure of the units of the division, with the units stationed in the barracks installations east of the Fibe River leaving by road and the others by rail. The unit entraised on 20 April is fairly definitely believed to have been the Golds Mecz Regt with the tank lattalion from the Nachrichton Kassana. The tanks observed on a train in Koenigsborn on 24 April, belonged to the 94th Gds Mtz Fifle Div. The	25X1
